

# iDea SEAL

## INNOVATIVE SEALING TECHNOLOGY

### ENGINEERED FOR SIMPLIFIED INSTALLATION

Cooper Standard Industrial and Specialty Group's iDea® Seal is a co-polymer design featuring a custom or standard EPDM bulb and a rigid plastic base, which provides reduced coefficient of friction for easy slide-in channel insertion and minimizes stretch. Available with a sponge or dense bulb, the iDea® Seal provides an excellent compression set, abrasion resistance, and a broad service temperature range suitable for various sealing applications.

### ENHANCED DURABILITY & PERFORMANCE

Built with high-performance materials, the iDea® Seal reduces noise, moisture, dust, and debris infiltration in demanding conditions. The energy-efficient EPDM bulb provides excellent weatherability, UV protection, and aging resistance for a long-lasting sealing solution.

### ADDITIONAL BENEFITS

- Available in Sponge or Dense
- Easy Channel Insertion
- Silicone Compatible EPDM
- Non-stretch
- Non-staining
- Available in Standard & Custom Profile Designs
- Custom Colors Available
