

# Total Safety and Environmental Culture

## Health, Safety, Environmental and Energy Policy

We are dedicated to Safety First as a Core Value by conducting ourselves and business in a responsible manner compliant with occupational health, safety, environmental, and energy regulatory and legal requirements.

### We are committed to:

- Providing safe and healthy working conditions for our employees, contractors and visitors that prevent all work-related injuries and illnesses;
- Eliminating hazards and reducing Occupational Health and Safety Risks;
- Reducing environmental impact through sustainable use of resources, enhancing environmental performance and continuously improving our energy performance;
- Establishing a framework for setting objectives to demonstrate continuous improvement in our management system;
- Partnering with our customers, suppliers and contractors to promote health, safety and environmental excellence; and
- Improving and supporting the communities where we work and live.

#### ISO 14001

- Protect the environment
- Prevent pollution
- Promote a sustainable circular economy

#### ISO 50001

- Design and procurement of energy-efficient equipment and services
- Provide information and resources to drive energy performance improvements

#### ISO 45001

- Communicate relevant OH&S information
- Provide consultation and participation of workers at all applicable levels
