

TONNEAU COVER
SEALING SOLUTIONS

IMPROVE AESTHETICS & PERFORMANCE

From selecting a compound to design optimization, Cooper Standard Industrial and Specialty Group (ISG)'s engineers work directly with customers to develop solutions for our customers' unique needs. We can provide a rubber or plastic seal—or a combination of the two—that is visually appealing, delivers superior performance and is easy to install.

MOLDED CORNERS & END DETAILS

For Tonneau covers, corner seals are a visible design feature, often bridging height variations. To improve upon butt joints and individual corner pieces, we can bond extrusions to create a single-piece frame. When an enhanced corner is required, the extrusion can be conjoined to a molded part.

ADDITIONAL BENEFITS

Improve fit, form and function by finishing tonneau cover seals with rubber or plastic end details.

- Single Frame or Component Install
- Superior Physical & Chemical Bonding While Preventing Potential Leaks
- Eliminate Manual Splices to Speed Up Manufacturing

Coating Applied

SURFACE COATINGS

Surface coatings can deliver an attractive finish for components used in tonneau cover applications. This improves initial appearance, makes the rubber resistant to collecting dust or grit and allows for easy cleaning. Coatings can be applied to an entire seal or a localized area on a part. They can also help improve performance by reducing noise, wear and abrasion.

ADDITIONAL BENEFITS

- Reduction in Coefficient of Friction
- Long-term Durability
- Available in Clear & Black
- No Free Silicone That Could Affect Paint Systems

iDea Seal Technology

SIMPLIFIED ASSEMBLY

Cooper Standard ISG's iDea® Seal technology features a rigid base that will smoothly slide into a channel on a tonneau cover frame during assembly without stretching. The result is more accurate cuts, assembly without adhesives and an overall tighter seal.

iDEA SEAL FEATURES

- EPDM Bulb (Sponge or Dense)
- Non-stretch Material
- Excellent Compression Set
- Easy Channel Installation
- Labor Savings
- Available in Standard and Custom Profiles
